Current position

Chancellor's Fellow and Lecturer, University of Edinburgh, Sep 2013-present.

Previous employment

NSF Postdoctoral Fellow (MSPRF) and Bing Instructor, University of Texas, Jul 2011-Aug 2013.

Education

- Ph.D. Mathematics, Massachusetts Institute of Technology, June 2011.
- B.S. Mathematics (minor: physics), University of Oregon, June 2006. *Summa Cum Laude*, Phi Beta Kappa.

Research Fields

Representation theory, quantum algebra, tensor categories.

My research centers on quantization problems in geometric representation theory. In particular, I am interested in fusion categories, deformation quantization, quantum groups, Hecke algebras, D -modules, and quantum Hamiltonian reduction. Currently, I am working to develop q -deformations of many constructions in Springer theory, with connections to quantum field theory, low-dimensional topology, moduli spaces of local systems, and multiplicative difference operators.
