

NATCOR

Convex Optimization Course

4 – 8 June 2018

Computing Information

The Modelling Stream makes use of computing labs (which are only available to Modelling Stream students and only during the timetabled hours). You will be given a temporary University of Edinburgh computing account. Your login name will be in the range `nat181...` `nat1845`. The initial password for all of these accounts is `natc0r18`.

What to do first:

When you first log in to a University PC, using your `nat*` username, enter `natc0r18` as the password. This is just a registration password so the first thing that you must do is set your own password via the University's authentication service, EASE, <https://www.ease.ed.ac.uk/register>.

Wi-Fi:

If you already have an eduroam account via your own institution, you can use it. In this case, make sure the login name used is `<institution-loginname>@<institution-domain>` (e.g. `jbloggs@hw.ac.uk`) rather than just the institution login name on its own. However, *you cannot use your personal eduroam account to log into the PCs*. If you are unable to use eduroam you will be provided with a temporary login to the University's "central" Wi-Fi.

Printing:

There will be no printer access for these accounts.
