Applications are invited for a Research Associate position in the Department of Mathematics at King's College London to work in the areas of algebraic number theory or algebraic/arithmic geometry. The position is funded by the Heilbronn Institute for Mathematical Research. *You will divide your time equally between your own research based at King's College London and the research programme of the Heilbronn Institute (London).*

A PhD in Mathematics relevant to the study of algebraic number theory or algebraic/arithmic geometry is essential. You will have proven research ability in mathematics, strong research potential and a track record of original research in algebraic number theory or algebraic/arithmic geometry. An outstanding research record commensurate with your level of experience and the potential for strong leadership qualities in the subject are also required, as is the ability to contribute significantly to the research environment of the research group and the Department of Mathematics as demonstrated, for example, through a proven track record of successful research interaction.

Information about the Department of Mathematics can be obtained from <http://www.kcl.ac.uk/nms/depts/mathematics/index.aspx>

Due to the nature of the Heilbronn Institute's work, you must satisfy vetting before appointment. UK resident UK nationals will normally be able to meet this condition; other potential applicants should consult the Director (details below) about their eligibility before applying.

Some of the Heilbronn Institute's work is highly confidential and subject to formal security procedures. All the internal research must be carried out within the Institute and not discussed, even in general terms, elsewhere, without explicit GCHQ permission. Fellows need to acquire, and continue to qualify for, a security clearance ('Developed Vetting') from GCHQ; they are subject to provisions of the Official Secrets Acts and restrictions on travel to certain countries.

The appointment will be made, dependent on relevant qualifications, within the Grade 6 scale, currently £31,644 – £37,756 (with possible progression to £38,907 subject to performance) plus £2,323 London Weighting Allowance per annum.

There is a salary supplement of £3.5K per annum, in recognition of the distinctive nature of these Fellowships. Payment of this supplement is conditional on a finished thesis having been accepted in final form, because it is an expectation that Heilbronn Fellows hold PhDs before working at the Heilbronn Institute.

This is a fixed-term appointment for 3 years.

**IMPORTANT NOTE:**

You are required to provide to two references when you submit your application. Please ensure these two references are sent to [recruitmentteam3@kcl.ac.uk](mailto:recruitmentteam3@kcl.ac.uk)

For additional information please contact Professor Shepherd-Barron at [nicholas.shepherd-barron@kcl.ac.uk](mailto:nicholas.shepherd-barron@kcl.ac.uk); telephone +44 (0)207 848 2975  +44 (0)207 848 2975.

Enquiries about the work of the Heilbronn Institute may be addressed to the Director of the Institute, Professor Geoffrey Robinson, telephone +44 (0)117 980 6303  +44 (0)117 980 6303, email: [g.r.robinson@bristol.ac.uk](mailto:g.r.robinson@bristol.ac.uk).

Imperial College London and University College London are recruiting similar research associates with a closing date of 6 April.

**Closing Date:** 14th April 2014

To apply, please visit the College's website via the 'Apply' button below.

To *apply* or for *more information* please see the university's website.
